DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1) a method of combating cancer by administering Ginkgo biloba extracts in claims 1-6.

2) a method of decreasing the expression of peripheral-type benzodiazepine receptors by administering Ginkgo biloba extracts in claims 7-16.

3) a method of increasing the expression of c-Myc protooncogene by administering Ginkgo biloba extracts in claim 17.

4) a method of decreasing the expression of cell cycle regulators by administering Ginkgo biloba extracts in claim 18.

5) a method of decreasing the expression of intracellular signal transduction modulators by administering Ginkgo biloba extracts in claim 19.

6) a method of decreasing the expression of apoptosis-related products by administering Ginkgo biloba extracts in claim 20.

7) a method of decreasing the expression of transcription factors by administering Ginkgo biloba extracts in claim 21.

8) a method of decreasing the expression of growth factors by administering Ginkgo biloba extracts in claim 22.

9) a method of decreasing the expression of cell adhesion molecules by administering Ginkgo biloba extracts in claim 23.

10) a method of decreasing the expression of genes claimed in claim 24 by administering Ginkgo biloba extracts.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added

The following claim(s) are generic: None.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The decreases or increases of various parameters recited in the species set forth above are different biochemical parameters which are not technically related to each other.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
